Other options (depending on machine model):

- inflated pressure balloon
- ultra soft pressure wheels
- discharge conveyor for removed skin
- transport roller with coarse or fine toothing
- foot switch for „manual“ operation on open top machine
- turnover device to skin both sides of flat fish

● **standard**

○ **optional**

① **restricted**

CF = tooth roller with scraper comb

GF = freeze drum

S = transport roller without grooves, with counter-rotating cleaning roller
